

## **EH-1 Enclosed Trailer Tool Storage System Instructions**

Thank you for purchasing a TrimmerTrap product. The EH-1's individual modular parts allow you the flexibility to customize tool storage in your enclosed truck, trailer or even the shop. Thought should be given as to how and where to install the different parts. Attach the floor mounted handle holder with a minimum of two 5/16" bolts and lock nuts. **Due to Varying Trailer Designs, Attaching Hardware NOT Included.** Be certain to check the underside of the floor for any wiring or other parts that could interfere with the chosen location. When choosing a mounting location, be sure the door(s) will close with a tool installed into the end receptacle.

When installing the EH-1 into a truck with an overhead door you must be sure there is sufficient clearance for the door when in the open and closed positions. All of the clips, including the grease gun holder should be attached to the liner inside the body (minimum thickness 3/4") using (two) sheet metal screws provided. The six spring action clips included have a gripping range of 7/8" to 1&1/2". The eight black vinyl coated clips included have a gripping range of 1&1/2" to 1&7/8". Be sure to install a tool into each handle holder receptacle to use as a reference for proper alignment when attaching its respective clip above the holder.

### **EH-1 Parts List**

	<b><u>Quantity</u></b>	<b><u>Part #</u></b>
vinyl coated spring steel clips	eight	EH CL-1
spring action clips	six	EH SQ-1
grease gun holder for standard 2 & 1/4" guns	one	EH GG-1
quantity of 5/8" sheet metal screws	one
