

DP-1 Mulching Plate Instructions (thru 2002 models)

Thank you for purchasing a TrimmerTrap product. The DP-1 mulching plate was designed to be installed into the discharge opening on Scag Advantage mower decks 36" through 72". On walk behind mowers with deck sizes 36", 48" and 52" and riding mowers with deck sizes 48" and 52".

The DP-1 can be installed in conjunction with or without the Scag Turbo baffle. (Better mulching results might be obtained using the DP-1 in conjunction with the Scag Turbo baffle) When installed on 61" walk behinds and 61" or 72" riders, the mower decks must be equipped with the Scag Turbo baffle.

Attach the DP-1 by drilling the deck and/or baffle to match up with four of the holes in the DP-1. Use the two front holes and two of the three rear holes on the DP-1. Attach the DP-1 by using the four bolts and lock nuts provided. Insert the bolts from under the deck with the lock nuts on the outside. Make certain that no part of the installation interferes with the rotating blades before operating the mower.

<u>DP-1 Parts List</u>	<u>Quantity</u>
5/16"-18 x 1 1/4" bolt	four
5/16" nylon lock nut	four
